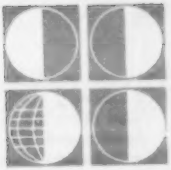
Index

SOCIAL BIOLOGY

Volume 30, 1983



AASE, JON M., 374–387
Abowitz, D., 279–289
Adolescents: mortality rates of, 78; sexual behavior of and public policy, 140–150
Adoption: and supply-demand theory of fertility, 35–36
Africa: supply-demand disequilibria and fertility change in, 41–58; attitudes toward contraceptives of university students in, 101–105
Age: and per cent of children in group quarters, 128; of mother and pregnancy outcome, 205–210; of mother and incidence of Down's syndrome, 349; and maternal mortality, 400–412
Ahern, F. M. 86–101
Ahlburg, Dennis A., 17–23
Alcoholism: among the Navajo, 13–14 *See also* Fetal alcohol syndrome.
Allen, Gordon, 118–119
American Indians: fetal alcohol syndrome among, 374–387
Amish: kin relatedness and church fissioning among, 59–68
Amniocentesis: benefit-cost analysis of, 347–373
Andhra Pradesh: mating systems and marriage distance patterns in, 67–74; inbreeding in, 109–112
Andhs: low inbreeding coefficient among, 67–74
Andreano, Ralph L., 347–373
Anencephaly: expected cases of annually in U.S., 361
Apache: cultural tradition of, 375–376
Arkansas: age of mother and pregnancy outcome in, 205–211
Automobile accidents: related to date of birth. 106–108

BANBURY REPORT 10: PATENTING OF LIFE FORMS: bk. rev., 429–430
Barbosa, C. A. A., 211–217
Basic Population Genetics: bk. rev., 120–122
Benefit-cost analysis: of amniocentesis, 347–373
Biology and the Social Sciences: An Emerging Evolution: bk rev., 339–341
Birth date: and automobile accidents, 106–108
Blacks: higher blood pressure among in Brazil, 211–217
Blood groups: and genetic distance in Nuevo Leon, Mexico, 24–31
Blood pressure: related to height and race in Brazil, 211–217
Brain drain: traced with reprint requests, 423–425
Brazil: race, height, and blood pressure correlated in, 211–217
Broudy, David W., 1–16

CAMPBELL, ELAINE, 307–317
Cancer: increased mortality from for older women, 75; and life expectancy statistics, 228–233
Cardiovascular-renal disease: and life expectancy statistics, 228–233
Caste: and endogamy in India, 109–112; variations of inbreeding among in India, 413–421
Causes of death: in different age groups, 75–85
Chambers, Victoria J., 151–157
Child replacement: hypothesis of tested, 218–227
Childlessness: voluntary and involuntary in U.S., 1955–73, 290–306; reasons for choice of by Scottish couples, 307–317; expressed intentions of and reported fertility, 318–327
Children: defining and measuring supply of, 32–41
Christians: attitudes of toward contraceptives in Nigeria, 103; inbreeding among in India, 413–421
Christiansen, John R., 151–157
Chuang, Jane-Lan Christy, 400–412
Cognitive ability: as predictor of educational and occupational attainment, 86–101
Cohort effects: on maternal mortality, 400–412
Congenital anomalies: incidence of, 348–349, 361
Consanguineous marriages: among five tribal groups in India, 67–74; in three castes in India, 109–111
Consanguinity: and return migration, 160
Contraception: and supply-demand economic theory of fertility, 32–38; attitudes toward among university students in Nigeria, 101–105; in a genetically counseled population, 328–334

DARWIN TO DNA, MOLECULES TO HUMANITY: 426–428
Death: effects of reduction of a risk of, 228–233
"Death dip" hypothesis: related to automobile accidents, 106–108
DeFries, J. C., 86–101
Demographic transition: among the Navajo, 1–16; and fertility among Moslem nations, 245–262
Down's syndrome: incidence of by maternal age, 349; expected cases of annually in U.S., 361
Driver, Aloo E., 189–204
Driver, Edwin D., 189–204

EASTERLIN MODEL: used to forecast U.S. fertility, 17–23
Easterlin, R. A.: economic theory of fertility of, 32–33
Economic theory: of fertility, 32–33; of fertility change in Africa, 41–58; and benefit-cost analysis of amniocentesis, 347–373

Education: and U.S. fertility, 1945–79, 127–139; curtailment of by teenage pregnancies, 148; costs of for mentally retarded and physically handicapped, 360–361
Educational attainment: predictors of, 86–101
Endogamy: in a multicaste village in India, 109–112;
Epidemiologic transition: among the Navajo, 1–16
Epidemiology: of fetal alcohol syndrome among American Indians, 374–387
Ethology, The Mechanisms and Evolution of Behavior: bk. rev., 342–344
Evolutionary biology: kin selection theory of applied to Amish church fissioning, 59–66

FAMILY BACKGROUND: as predictor of educational and occupational attainment, 86–100
Family planning programs: and fertility decline in Moslem countries, 253–256
Fertility: future of in U.S., 17–23; economic theory of, 32–33; and supply-demand disequilibria for children in Africa, 41–58; and educational attainment, 132, 133, 135; in the U.S., 1945–79, 127–139; child replacement hypothesis of tested, 218–227; in Moslem countries and the demographic transition model, 245–262; and the timing of spouse separations, 279–289; and expressed intentions of childnessness, 318–327; in Taiwan, 388–399
Fetal alcohol syndrome: among American Indians, 374–387
Finkel, David J., 140–150
Finkel, Madelon Lubin, 140–150
Fitness: modification of in offspring by affected parents, 181–188
Foundations of Ethology, The: bk. rev., 235–238
Fuller, John L.: presidential message of, 112–114; bk. rev. by, 339–341

GARZA-CHAPA, RAUL, 24–32
Gee, Ellen, 75–86
Genetic admixture: in modern Mexico, 24–31
Genetic counseling: and contraceptive use and efficacy, 328–334
Genetic distance: measured by blood groups in Mexico, 24–1
Genetic drift: and return migration, 160
Genetics: of blood groups frequencies in Mexico, 24–31; and return migration, 158–161; and social selection and modification of fitness, 181–188; and congenital anomalies, 348–349
Gottesman, Irving I., 341–342
Gould, J. L., 342–344
Group fissioning model: applied to Amish, 59–66

HAILMAN, JACK P., 235–238
Harbison, Sarah, 32–40
Hardy, Robert J., 228–233
Height: and weight correlated with social class in Madras, 189–204; related to race and blood pressure in Brazil, 211–217
Hindus: inbreeding coefficient among in India, 413–421
Hirsch, Jerry, 116–118
Hurd, James P., 59–66
Hymbaugh, Karen J., 374–387

INBREEDING: among the Amish, 62–65; in three endogamous groups in India, 109–112; and return migration, 160; and religion in India, 413–422
India: mating systems and marriage distance patterns in, 67–74; inbreeding in, 109–112; social class related to height and weight in, 189–204; opportunity for natural selection in, 335–338; brain drain from, 423–425
Indians. *See* American Indians, Apache, Navajo, Plains Indians, Pueblo Indians, Ute.
Infant mortality: among the Navajo, 9–11; correlates of among teenage pregnancies, 205–210; and child replacement theory tested, 218–227
IQ: and occupational level, 86
IQ Game, The: A Methodological Inquiry into the Heredity-Environment Controversy: bk. rev., 116–118
Ireland: return migration to, 159–161

JEJEEBHOY, SHIREEN J., 388–399
Johnson, R. C., 86–101

KENYA: fertility in, 48–55
Kin selection theory: and church fissioning among the Amish, 59–68
Kinship systems: effect of on supply of children, 32–38
Kobrin, F. E., 279–289
Kocher, James E., 41–58
Kolams: high inbreeding coefficients among, 67–74
Kramer, Kathryn Beth, 290–306
Krieger, H., 211–217
Kunz, Phillip R., 106–108, 151–157

LEE, EUN SUL, 228–233
Lees, Francis C., 158–161
Levine, Louis, 120
Levitan, Max, 429–430
Life expectancy: increased by reducing risks of death, 228–233
Lorenz, Konrad Z., 235–238

MACKENZIE, THOMAS P., 341–342
McClearn, G. E., 86–101
McCollum, Daniel W., 347–373
Madigas: inbreeding among, 109–112
Madras: height, weight, and social class in, 189–204
Maiorana, Virginia C., 426–428
Mangold, William D., 205–211
Marriage: and distance patterns in India, 67–74; physical similarity as a factor in, 151–157; and minority-type mate preference, 162–180
Marriage patterns: and supply of children, 32–38

Massachusetts: child replacement hypothesis tested in, 218–227
Mate selection: and distance in India, 67–74; and preference for minority type, 160–180; and physical similarity, 151–157
Maternal age: and pregnancy outcome, 205–210; and Down's syndrome, 349; and maternal mortality, 400–412
Mathuras: low inbreeding coefficient among, 67–74
May, Philip A., 1–16, 374–387
Measuring Change in Nutritional Status: Guidelines for Assessing the Nutritional Impact of Supplementary Feeding Programmes for Vulnerable Groups: bk. rev., 428–429
Menarche: and age of marriage in India, 69
Mental retardation: developmental characteristics of, 351; costs of education in, 361
Mexico: genetic distance and blood groups in, 24–32
Michael, Richard P., 263–278
Migration: and supply of children, 32–38; and opportunity for natural selection in India, 335–338 *See also* Return migration.
Minority type: mate preference, 162–180
Morality as a Biological Phenomenon: bk. rev., 122–124
Mortality: among the Navajo, 5–8; accelerating sex differentials in, 75–85; reduction in risks of, 228–233; age, period, and cohort effects on in childbith, 400–412 *See also* infant mortality.
Morton, N. E., 211–217
Moslems: attitudes toward contraceptives of in Nigeria, 103; fertility among and the demographic transition model, 245–262; inbreeding among in India, 413–421
Motor vehicle accidents: effect of on life expectancy statistics, 228–233

NAGI, MOSTAFA H., 245–262
Nagoshi, C. T., 86–101
Natural selection: opportunity for among three groups in India, 335–338
Navajo: demographic and epidemiologic transition among, 1–16; cultural traditions of, 375–376; incidence of fetal alcohol syndrome among, 379
Negro ancestry: effect of on blood pressure in Brazil, 211–217
Neoplasms: increase of in older men and women, 75; effect of on life expectancy statistics, 228–233
New York State: maternal mortality in, 404
Nigeria: attitudes toward contraceptives of university students in, 101–105; reprint requests received in, 423–425
Nuevo Leon: genetic distance and blood groups in, 24–31

OCCUPATION: and IQ, 86
Occupational attainment: predictors of, 86–101
On the Evolution of Human Behavior: The Argument from Animals to Man: bk. rev., 234–235
Onuigbo, Wilson I. B., 423–425
Otten, Charlotte M., 234–235
Owie, Ikponmwosa, 101–105

PARENTHOOD: perceived penalties of by the voluntarily childless, 308–311
Period effects: and maternal mortality, 400–412
Period fertility rates: in the U.S., 1945–79, 127–139
Personality: as predictor of educational and occupational attainment, 86–101
Photoperiod: and human violence, 275
Physiognomic homogamy: as a factor in mate selection, 151–157
Pingle, Urmila, 67–74
Plains Indians: cultural traditions of, 375–376; incidence of fetal alcohol syndrome among, 379
Plant, David W., 429–430
Pol, Louis G., 318–327
Pollitzer, William S., 342–344
Population: growth of among the Navajo, 1–3; forecasts of U.S. cycles of growth in, 17–24; social selection and modification of fitness in, 181–188
Poston, Dudley L., Jr., 290–306
Potter, R. G., 279–289
Pradhans: high inbreeding coefficients among, 67–74
Pregnancy: of adolescents and public policy of U.S., 140–150; outcome of and age of mother, 205–210
Pringle, Dorothy J., 428–429
Public policy: and adolescent sexual behavior in the U.S., 140–150
Pueblo Indians: cultural traditions of, 375–376; incidence of fetal alcohol syndrome among, 379

RACE: and fertility in the U.S., 1945–79, 127–139; correlated with height and blood pressure in Brazil, 211–217
Race, Social Class, and Individual Difference in IQ: bk. rev., 118–119
Raj Gonds: high inbreeding coefficient among, 67–74
Rao, A. Papa, 109–112
Rao, D. C., 211–217
Rao, P. S. S. Sundar, 413–422
Reddis: consanguinity coefficient among, 109–112
Reddy, B. Mohan, 335–338
Reddy, V. Rami, 109–112
Reimers, Neils J., 429–430
Relethford, John H., 158–161
Religion: and attitudes toward contraceptives in Nigeria, 101–105; and intensity of inbreeding in India, 413–422
Reprint requests: as tracers of brain drain, 423–425
Return migration: genetic implications of, 158–161
Reynolds, Peter C., 234–235
Rice, John P., 181–188

Rindfuss, Ronald R., 127–139
Ryder, Norman P., 238–241

SALK, JONAS, 238–241
Salk, Jonathan, 238–241
Samet, Jonathan, 374–387
Scarr, Sandra, 118–119
Schizophrenia: The Epigenetic Puzzle, 341–342
Sephardic Jews: genetic contribution of to Mexican population, 29
Sex: mortality differentials by, 75–86
Sex education policies, 145–147
Sexual aggression: annual rhythms in and the role of temperature, 263–278
Sexual behavior: of adolescents and U.S. public policy, 140–150
Shields, James, 341–343
Social biology: directions of, 112–114. *See also* Society for the Study of Social biology.
Social class: and height and weight in Madras, 189–204
Social selection: and the modification of fitness of offspring by affected parents, 181–188
Society for the Study of Social Biology: message from President of, 112–114; symposium on changing patterns of disease sponsored by, 115
Socioeconomic status: and U.S. fertility, 1945–79, 127–139; correlated with height and weight in Madras, 189–204; effect of on infant mortality in teenage pregnancies, 205–210; in 28 Moslem countries in 1970, 253,255
Sorenson, James B., 328–34
Spina bifida: expected number of cases annually in U.S., 361
Spouse separations: effects of on fertility, 279–289
Stebbins, L. Ledyard, 426–428
Stent, Gunther S., 122–124
Swedlund, Alan C., 218–227
Sweet, James A. 127–139

TAIWAN: increasing natural fertility in, 388–399
Tamil Nadu: inbreeding and religion in, 413–422
Tanzania: fertility in, 48–55
Taylor, Howard F., 116–118
Teenage pregnancy: and U.S. public policy, 140–150; and infant mortality rates, 205–210
Tempkin-Greener, Helena, 218–227
Temperature: role of in annual rhythms in human violence and sexual aggression in U.S., 263–278
Thelen, Thomas H., 162–180
Thiessen, Del, 122–24
Tsai, Shan Pou, 228–233
Tu, Edward Jow-Ching, 400–412

UNITED STATES: forecast of birth cycles in, 17–24; period fertility rates in, 1945–79, 127–139; age of mother and pregnancy outcome in, 205–210; child replacement hypothesis tested in, 218–227; annual rhythms in human violence and sexual aggression and the role of temperature, 263–278; voluntary and involuntary childlessness in, 290–306
United States government: policies and laws of on sex-related health services, information, and education, 140–150
Ute: cultural traditions of, 375–376

VANDENBERG, S. G., 86–101
Van Valen, Leigh H., 426–428
Veevers, Jean E., 75–85
Violence: annual rhythms in and the role of temperature, 263–278

WALLACE, BRUCE, 120–122
Weight: and height correlated with social class in Madras, 189–204
Wertz, Dorothy C., 328–334
Wette, R., 211–217
Wiegele, Thomas C., 339–341
Williams, Carla, 106–108
Wilson, J. R., 86–101
Women: status of and fertility decline in Moslem countries, 256–259
World Health Organization, 428–429
World Population and Human Values: A New Reality: bk. rev., 238–241

YADAVAS: inbreeding among, 109–112
Yokoyama, Shozo, 181–188

ZINDER, NORTON D., 429–430
Zumpe, Doris, 263–278
